*BECAUSE The Union is cash poor in a time that is really a good growth period, and we love this place.*

*After 3 years the studio has arrived!!! with a level of attendance that allows it to be financially self-sustaining.*

*"I am confident that it will continue to grow, however the slowing economy, along with an untimely personal challenge, currently puts The Union at unnecessary risk" (Maggie - founder).*

*Vested in the principle of making yoga affordable to everyone, The Union now requires a little boost from the community help get through this transition.*

*Please come out to celebrate and make sure we have the support to continue providing such essential services. Thanks from everyone @*
